### SUMMARY

**Senior Java Software Engineer** with over 6 years of experience in developing and maintaining Java applications. Proficient in all phases of the software development lifecycle, with a solid background in back-end development, API integration, and microservices architecture. Adept at collaborating with cross-functional teams to deliver robust and scalable solutions.

### TECHNICAL SKILLS

- **Programming Languages:** Java, Groovy, SQL, TypeScript, Virtual Basic
- **Front-End Technologies:** Angular, HTML, CSS
- **Back-End Technologies:** Spring, Spring Boot, Hibernate, JPA, MapStruct
- **Database Management:** Oracle, PostgreSQL, MongoDB, Redis, Liquibase
- **Web Development:** RESTful APIs, OpenAPI, SOAP, WebSockets
- **Messaging/Event Streaming:** Kafka, RabbitMQ, HermesJMS
- **Build Tools:** Gradle, Maven
- **Version Control:** Git, Bitbucket, GitHub, SVN
- **DevOps & Observability Tools:** Docker, Jenkins, Kibana, Elasticsearch, Kiali
- **Testing Frameworks:** JUnit, Mockito, WireMock, TestContainers
- **Containerization and Orchestration:** Docker, OpenShift
- **Agile Methodologies:** Scrum, Kanban
- **Other Tools:** Jira, Confluence, IntelliJ IDEA Ultimate, Teams

### WORK EXPERIENCE

#### Java Developer, SYTOSS

Apr 2019 - Jan 2026

**Technologies:** Java, Spring Boot, Hibernate, PL/SQL, OpenShift, Jenkins

- Maintained and enhanced enterprise-level Java applications using Spring Boot and Hibernate.
- Designed and implemented RESTful APIs to facilitate seamless communication between front-end and back-end systems.
- Utilized JPA for database interactions and managed Oracle databases.
- Integrated RESTful APIs with front-end components, ensuring smooth data flow and user interactions.
- Configured and customised AmdocsCRM modules for telecom clients, improving customer data management.
- Collaborated with QA and business teams to fix issues, improve system performance, and ensure data accuracy.
- Participate in Agile ceremonies and contribute to sprint planning, estimation, and retrospectives.
- Lead a team of junior developers, providing mentorship and technical guidance.

#### Key Achievements:

- Played a key role in developing and integrating microservices during the migration from a monolithic system to a distributed architecture on OpenShift, improving scalability and maintainability.
- Improved automation and system reliability by integrating backend services and workflows for full order lifecycle management and security.

## EDUCATION

---

### **Bachelor's degree, Automation Engineer**

National Technical University «Kharkiv Polytechnic Institute»

Sep 2016 - Jun 2020

## ADDITIONAL INFORMATION

---

### **Languages:**

- English - Upper-Intermediate
- Ukrainian - Native
- Russian - Native

### **Certifications:**

- Software Architecture & Design of Modern Large Scale Systems (Udemy)
- Docker - Hands On for Java Developers (Udemy)
- Java Multithreading, Concurrency & Performance Optimization (Udemy)
